AMURA come amore, come “eclissi di sole” in tahitiano o “grande sorriso” in giapponese. Ma Amura è soprattutto il calore mediterraneo della sua terra di origine Altamura, la bellezza fragile e autentica della terra del sud, il saper fare della tradizione, che dà sempre la qualità per scontata. Una ricerca continua di materie naturali, l'ambizione di un design come sintesi perfetta di forma e funzione, l'attenzione maniacale di una lavorazione artigiana in un contesto di avanzata tecnologia. Sono i valori di AMURA.

AMURA as “amore”, as “solar eclipse” in Tahitian, or “wide smile” in Japanese. But above all: Amura is the Mediterranean warmth of the territory of its origin, Altamura, is the fragile and authentic beauty of the South, is the traditional craftsmanship, with quality as a given. An ongoing research of natural materials, the ambition of creating a perfect synthesis of form and function with its design, the obsessive attention of artisanal finishes in a technologically advanced context. These are the values in AMURA.

AMURA, comme “amore”, comme “éclipse solaire” en tahitien ou “grand sourire” en japonais. Mais, avant tout, Amura c’est la chaleur méditerranéenne de sa terre d’origine, Altamura, la beauté fragile et authentique de la terre du Sud, le savoir-faire de la tradition, avec, depuis toujours, comme principe la qualité. Une recherche incessante de matières naturelles, l’ambition d’un design comme synthèse parfaite de formes et fonctions, l’attention extrême d’une fabrication artisanale dans un contexte de technologie avancée. Voici les valeurs de AMURA.

Nato dalla terra It grows out of the land — Il naît de la terre

Il sapore della terra, il calore e i colori del Mediterraneo, la preziosità della materia, la memoria del corpo, tutto si intreccia nella ricerca della migliore relaxing experience di sempre, che vuole ricongiungere l'uomo e la natura, in una dimensione quasi ancestrale. Lapis è un organismo vivente, che continua a trasformarsi nei volumi, nello spazio e nelle materie plasmate e rese morbide dal trascorrere del tempo, che emergono in maniera spontanea da un selciato arcaico. È la morbidezza della seta del tappeto, della pelle del divano unita alla solidità della pietra dei tavoli che costituiscono un ecosistema di design innovativo, fertile e di solida bellezza.

The flavour of the land, the warm colors of the Mediterranean Sea, the preciousness of the matter, the reminiscence of the body, everything is connected in the search for the best relaxing experience ever, an experience aimed at the reunification between man and Nature, in a nearly ancestral dimension. Lapis is a living organism, ceaselessly transforming in its volumes, in the space and in the materials – molded and smoothed by the passing of time – emerging spontaneously from archaic cobblestones. The softness of the silk carpet, of the leather on the sofa, combined with the solidity of the stone used for the coffee tables: all of this adds up to an innovative design ecosystem, fertile and of a robust beauty.

La saveur de la terre, les couleurs chaudes de la Méditerranée, la préciosité de la matière, la mémoire du corps, tout s'entrecroise à la recherche de la meilleure relaxing experience de jamais, qui veut réconcilier l'homme et la nature dans une dimension quasi ancestrale. Lapis est un organisme vivant, qui continue à se transformer dans ses volumes, dans l'espace et dans les matériaux modelés et adoucis par le temps, qui émergent presque spontanément de pavés archaïques. La douceur de la soie du tapis, du cuir du canapé mariée à la solidité de la pierre des tables basses constituent un écosystème de design innovateur, fertile et de solide beauté.
